N13 TRPG - Roleplay Games

## **Iced Earth - Last Night in London**

# Contexte

Lieu	Mars
Époque	1886

The game is set in an alternate 1886 where the eruptions of Krakatoa and Mount Tambora, the dimming of the Sun, and other unknown factors caused a worldwide volcanic winter. This in turn led to widespread crop failure and the death of millions. This event roughly lines up with the real world 1883 eruption of Krakatoa, a volcanic event that led to global cooling.

A group of ex-criminal explorator is charged to find a coal mine to supply London, but if they come back with empty hands, London government will kill them. Unfortunately, the mine they have to dig in is already empty. Three solutions appear, face London's Captain, try to find another mine, or escape from London's hunters.
